DESCRIPTION:

For construction work in built-up urban areas, limited ground space and crane availability are often a major problem. The Common Tower with STROS elevators is a popular solution to such problems for clients and developers who want to build high-rise buildings as efficiently as possible. The advantage of using the Common Tower in combination with STROS elevators is that one landing access point can serve up to six elevators, where one side is the exit to the building and the other three sides serve as landing access for STROS elevators in SINGLE, DUAL or TWIN-MAST combination. Here you can find STROS accessories developed specifically for use with Common Tower.

A range of components designed specifically for the Common Tower.

Components for elevators in SOLO, DUAL and TWIN-MAST configuration.

The products of STROS a.s. are designed, manufactured and approved according to valid European legislation.

COMMON TOWER EQUIPMENT FOR LANDINGS - SINGLE / DUAL

Set of:
Double Wing Landing Gate 1 460 mm
Double Wing Landing Gate 1 960 mm
SINGLE / DUAL

Set of:
Protection Panel 1 460 mm
Protection Panel 1 960 mm
SINGLE / DUAL

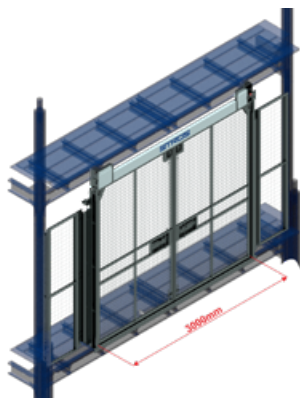

Set of:
Double Wing Landing Gate 1 460 mm
Protection Panel 1 960 mm
